Beyond Violence

Beyond Violence is the first manualized intervention for women that focuses on anger and utilizes a multi-level approach and a variety of evidence-based therapeutic strategies (i.e., psychoeducation, role playing, mindfulness activities, cognitive-behavioral restructuring, and grounding skills for trauma triggers). This four-level model of violence prevention considers the complex interplay between individual, relationship, community, and societal factors. The program is designed to assist women in understanding trauma, the multiple aspects of anger, and emotional regulation.
